Our Giant pumpkin seeds are from larger pumpkins than many of the other bulk sellers. The seeds are bigger than most thus the lower amount per pound. Many of the seeds have parents in the background over 1000 pounds. The bulk seeds are the remnants of genetics projects and additional fruit on plants. These seeds are truly from field grown 300-500 pound pumpkins meaning that under proper spraying, climate, and soil they can do the same for you!
